

In the specification:

Please replace the title with:

A SYSTEM FOR DETERMINING THE GENERAL LATITUDE OF A FAULT

Please amend the abstract as follows:

Bi
~~A system for detecting precursor seismic-electromagnetic waveforms.~~ A method
of determining the general latitude of a fault within the earth with a sensor. A frequency
component of a signal coming from said fault sensed by the sensor is associated with the general
latitude of the fault. The sensor is not proximate to the fault.
